

# Sports Car Club of New Hampshire

March 5, 2011

On Feb 27, 2011, the SCCNH held its first winter event in years. We held it in a frozen lot at NHMS. The lot crew had plowed the whole lot the day before so we did not have big snow banks to keep us on the track. Terry & crew had laid out the course after they plowed with pylons. Luckily it had snowed the night before so we had some snow on the course and the pylons were secured in place.

I must admit to wondering how things would go since we were in a parking lot, not on a pond as we used to be years ago. My fears were laid to rest real fast. The course stayed as laid out and it looked like a fun one to drive. There was a nice mix of all wheel drive, front wheel drive and rear wheel drive cars. The AWD cars were shown up by the front wheel drive cars. Dave Burden showed them all what a diesel, and a smartly used left foot, can do on ice.

Watching them slip & slide around the course made me feel, I'm going to run next time we do this next year as well as work. I vote we set up 2 or 3 dates next winter. Like when we started the auto-x series years ago, once word gets out we're holding these WinterX's and how much fun they are, more people will come and want to share in the fun.

Great job to Terry & crew for a well run event.

George Young
